

Angle Information

Parallel Lines

Chapter 03

Geometry

A BowerPoint Presentation

If corr \sphericalangle s \cong , then lines \parallel

If $\sphericalangle 1 \cong \sphericalangle 2$ then

$l \parallel m$

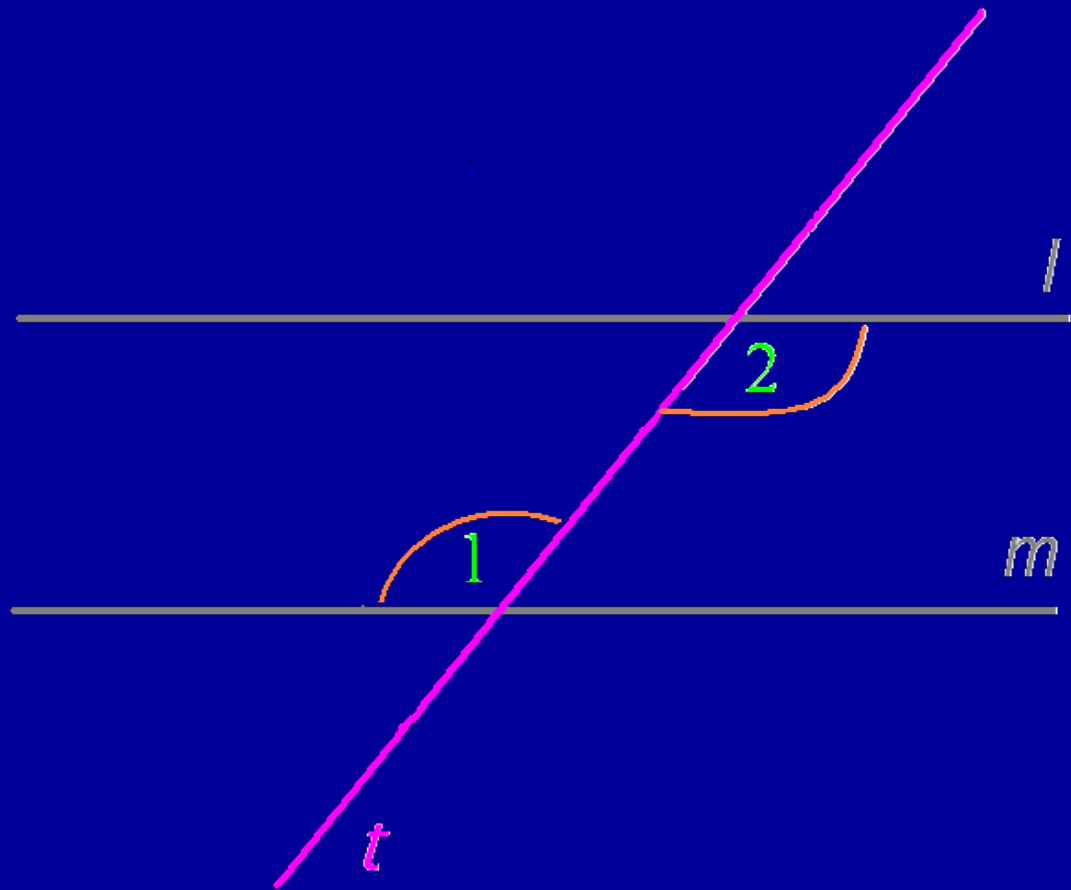

If alt int \angle s \cong , then lines \parallel

If $\angle 1 \cong \angle 2$ then

$l \parallel m$

If alt ext \angle s \cong , then lines \parallel

If $\angle 1 \cong \angle 2$ then

If s-s int \sphericalangle s supps, then lines \parallel

If $\sphericalangle 1$ & $\sphericalangle 2$ are supps

$l \parallel m$
