

**DIRECTIONS:** Use the sine (sin), cosine (cos), and tangent (tan) ratios to solve for  $x$  and  $y$  in the following right triangles. Round your answers to the nearest tenth (one decimal place). Show all work.

1.  $x = 40.7$

$y = 45.0$

2.  $x = 43.8$

$y = 29.8$

3.  $x = 12.6$

$y = 15.5$

4.  $x = 216.4$

$y = 221.2$

5.  $x = 43.7$

$y = 24.2$

6.  $x = 95.8$

$y = 91.6$

7.  $x = 17.6$

$y = 11.4$

8.  $x = 2.8$

$y = 16.2$

9.  $x = 7.5$

$y = 11.6$
